Follow the link above for diagrams.

Materials for Tabletop Tipi Model

- 4 straight sticks each about 12 inches in length
- rubber band or string
- ruler
- pencil
- cardboard or heavy card stock
- 1 brown paper bag
- scissors
- markers or colored pencils

How to make a Tabletop Tipi Model

1. First, gather four straight sticks.
 2. Gather the sticks together and bind them together a few inches from the top with a rubber band or string.
 3. Spread out the sticks at the bottom to form the frame for the tipi.
 4. Measure the approximate size of one side of the tipi.
 5. Cut a triangle out of cardboard approximately the same size as the side of the tipi.
 6. Use the cardboard stencil to draw four adjacent triangles on the paper bag as shown
 7. Cut out the adjacent triangles all as one piece.
 8. Cut a door at the bottom of one of the sides.
 9. Decorate the paper if you want to.
 10. Crease the paper along the sides of the triangle and fold together.
 11. Snip just a little bit off of the top, so there is room for the sticks to poke through.
- Put the paper sides on top of the stick frame and tape together.
