

# FIRST AID FOR CUTS DEMONSTRATION

<https://scoutermom.com/541/first-aid-for-cuts-demonstration/>

## Materials

- Red marker
- Antiseptic
- Band-Aids
- Small latex gloves
- Gauze pads
- Tape

## Instructions

1. Give each Scout a small “cut” with the marker - just a quarter inch or so.
2. Have them wash the cut with soap and water and apply the antiseptic.
3. Then have them put a band-aid on the cut.
4. Next give them a larger “cut” with the marker - about a half inch.
5. For this “cut”, they will bandage each other, so have them put the gloves on.
6. Show them how to apply pressure and have them practice this on each other.
7. Let them cover each other’s cuts with a gauze pad and secure it with tape.
8. You can also show them how to use a neckerchief to secure the pad.
